

ZX Model

Electric motor driven horizontal cooler for off skid applications Single or multi-fan cooler

ZX Model Specifications:

- Adaptable to field compression units in the range of 150HP and greater.
- Fan diameters ranging from 96" to 192".
- Wide range of configurations utilizing single or multiple fans.
- Electric motor driven; adaptable to other drive types if desired.

ZX Model Summary:

- Convenient accessibility to all drive components including the motors, bearings, and fans.
- Adaptable to different fan drive types.
- Tubular shaft and bearing support offer improved drive life and meets OSHA guarding requirements.
- Heavy gauge sheet metal plenums increase structural rigidity, minimize vibration, and improve cooler life.
- Scalable to cool substantial volumes of process fluids.
- Eads standard designs offer industry leading safest loading and transportation handling with top mounted lifting lugs.
- Add on options for this cooler include items such as: hail guards, bug screens, and auxiliary louvers.
- Supplied with top-of-the-line bearings, fans, and shafts to minimize operational costs and improve run time.
- Structure offered with customer preferred paint or galvanizing.
